

KONICA MINOLTA

WORKPLACE
OF THE FUTURE™

Improving Productivity, One Meeting at a Time.

workplace optimization

Collaboration.

Making a company more productive and efficient is the goal of every organization. Yet today, the average employee spends anywhere from 35% to 50% of his or her time talking through a project rather than working on it.¹ Meetings are multiplying—yet available meeting space is in high demand.

Teem makes meetings more productive by helping connect people with the right meetings rooms and resources, keeping meetings on track, and streamlining how employees schedule and conduct meetings. Beyond that Teem generates analytical data and provides recommendations for improving your company's meeting behavior.

Teem provides solutions to your scheduling and conference room management problems. It's just one of the ways Konica Minolta is reshaping the Workplace of the Future™, helping you work smarter, more productively and collaboratively. Giving shape to ideas that connect people with the tools and resources they need to live and work better.

Teem Helps Your Organization Work Better Together, Creating a More Productive Workplace.

Teem is a powerful, cloud-based platform that improves how meetings are planned and executed—while revealing trends and patterns about how companies meet and collaborate. How? By offering two sets of features:

Employee Meeting Tools

That connect your people with the right resources for meetings when and where they need them.

- Eye-catching conference room displays show room availability at a glance and accept ad hoc bookings right from the display
- Mobile booking allows employees to search for the best meeting room and resources for their needs, then book the meeting right from their phone

Activity Driven Insights

That dig deep into your company's meeting and space use behaviors, giving you answers to questions about how your people, places and technology interact, such as:

- Find out which rooms are under or over-utilized
- Discover how often meetings are canceled
- See if you need to expand, consolidate or repurpose current space or plan new spaces
- Calculate how much meetings are costing your organization

Teem is the Secret Weapon for a Better Workplace

- Runs on affordable, readily available hardware (iPads® / Android®)
- Syncs with popular calendar systems such as Microsoft Exchange, Office 365, Outlook and Google
- It's easy to implement and scale up across buildings, floors and campuses
- Strict security policies include incident response management procedures, user access control, SSL data transport, data encryption and routine pen tests
