GOVERNMENT & PUBLIC SAFETY VIDEO SECURITY

WHERE ARE YOUR DEFICIENCIES?

OPTIMAL OVERSIGHT

Avoid blind spots and coverage gaps around corridor corners and entrances to municipal buildings by knowing the field of vision your MOBOTIX cameras will provide. Improve your oversight across your entire complex.

PUBLIC SAFETY

Keep an eye on parking lots to ensure capitol, courts, correctional facilities, parks and recreational facilities, and staff, constituents and visitors are in your view. Even in low-light – our high-resolution images and moonlight technology deliver unparalleled clarity from your well-positioned MOBOTIX cameras.

AUTHORIZED AREA

Monitor the safety complex to detect unwanted confrontations and protect vehicles and equipment. Ensure private or restricted areas are not breached by unauthorized visitors with Heat-Mapping technology or Loitering Alerts.

LITIGATION MITIGATION

With high-resolution images that deliver unparalleled clarity in agencies that require staff / constituent exchanges, clearly see interactions with the level of quality that your town legal team needs to address any incidents.

AGGRESSIVE CONSTITUENTS

Set up real-time alerts on your security network to pre-empt theft, intruders, aggressive protesters, property damage and potential staff injury liability. Also, use entrance cameras to capture any potential hostile situation.

PRESENT-DAY TECHNOLOGY

Upgrade legacy systems in your municipality and across your public safety complex against unsecured camera backdoors into your data. Use cloud for image storage and build a connect network to monitor from one dashboard.

KONICA MINOLTA

From constituent safety to government complex security, Konica Minolta Video Security Solutions provides the metrics, clarity, reliability and flexibility that you need to respond to alerts, monitor visitor activity, provide internal and external security and employ the level of detection you need.
