Konica Minolta's Director of Color Solutions, Dr. Mark Bohan (L), reviews output from the AccurioShine 3600 digital embellishment press with Cal Poly Graphic Communication students Kevin Manni (M) and Anney Haong (R).

Konica Minolta's AccurioLabel 400 offers CMYK and a new fifth station white dry-toner for true white applications that expands creative label design.

The new Konica Minolta AccurioWide 250HS is a wide-format hybrid printer designed for print shops that prioritize versatility, productivity and high-quality output. With a print width up to 98" (2.5m), UV LED curing and a six-color plus white ink set, this press supports a wide range of indoor and outdoor print applications.

Konica Minolta's AccurioPress C14010S streamlines operations, boosts productivity with automation and opens new revenue streams with the introduction of fifth color, white toner printing.

Konica Minolta's AccurioShine 3600 with iFoil One option is the company's newest inkjet spot UV printer, powered by MGI's innovative varnish technology with Konica Minolta's reliability. The device enables in-house spot UV varnishing, from prototyping to full production, without the need for screens, plates or dies.

The AccurioJet 30000 is Konica Minolta's most innovative digital UV inkjet press to date. As the successor to the AccurioJet KM-1e, the AccurioJet 30000 continues Konica Minolta's unsurpassed, proven and stable technology with insistence on professional quality. With new functions to maximize throughput and operator performance, improve productivity and image quality and ensure labor savings through automation, the technology will ultimately contribute to increased revenue for customers.

The versatile AccurioPress C4080 digital press is an all-in-one print manufacturing powerhouse providing features to streamline workflow and print output that will exceed customer expectations. Advanced real-time automation of color and registration management combined with sophisticated inline finishing options allows businesses to excel at delivering a variety of print applications.
